

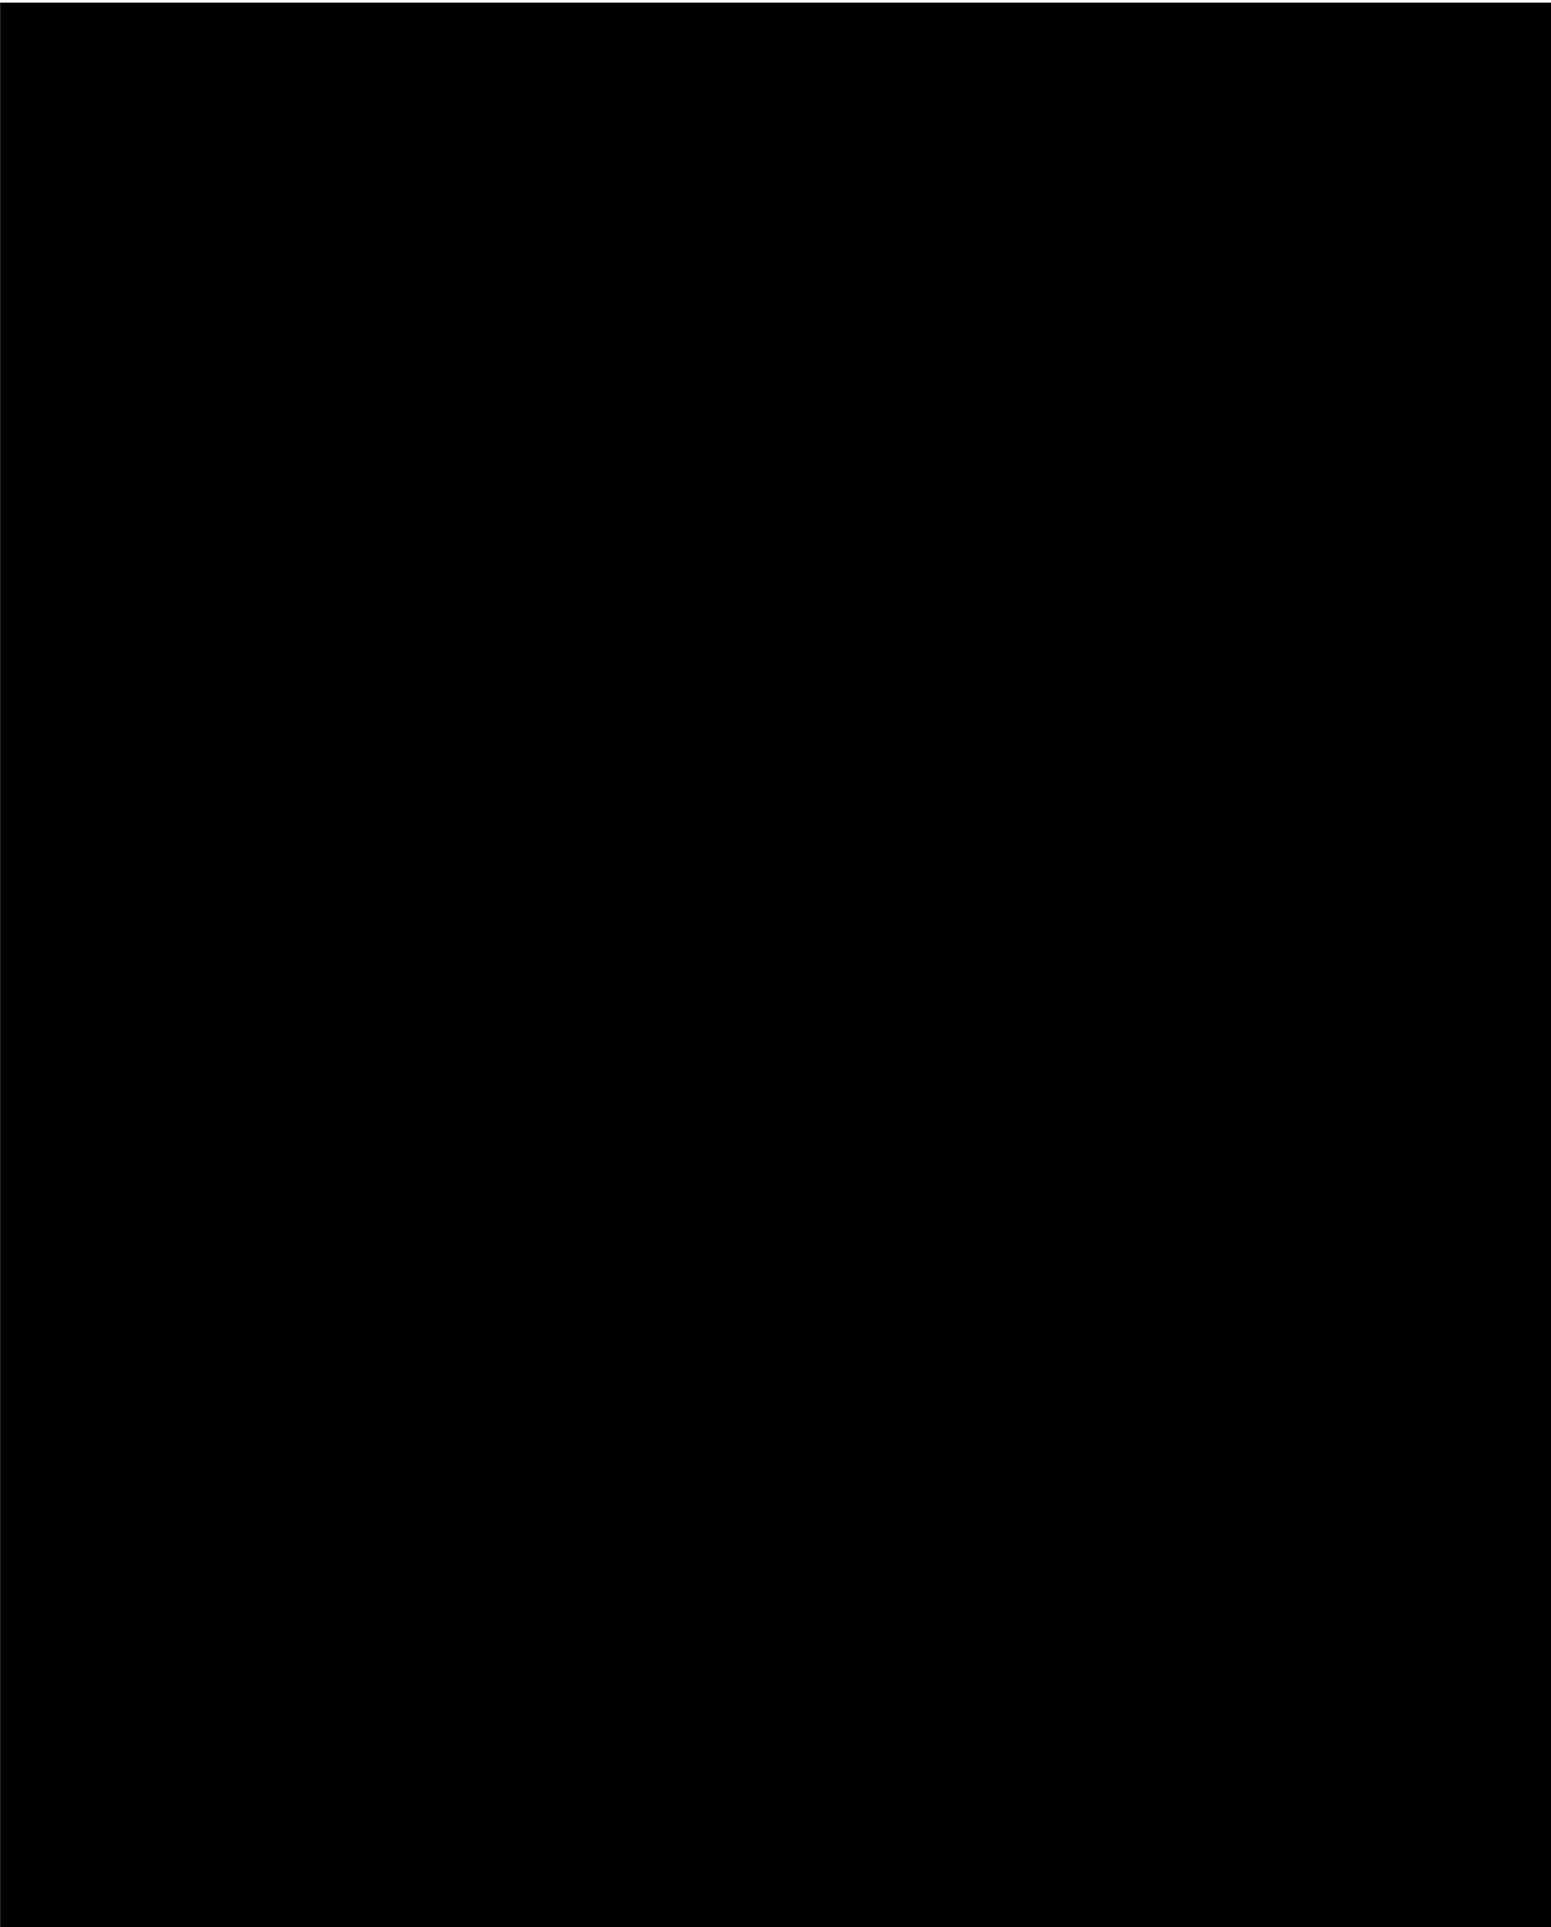

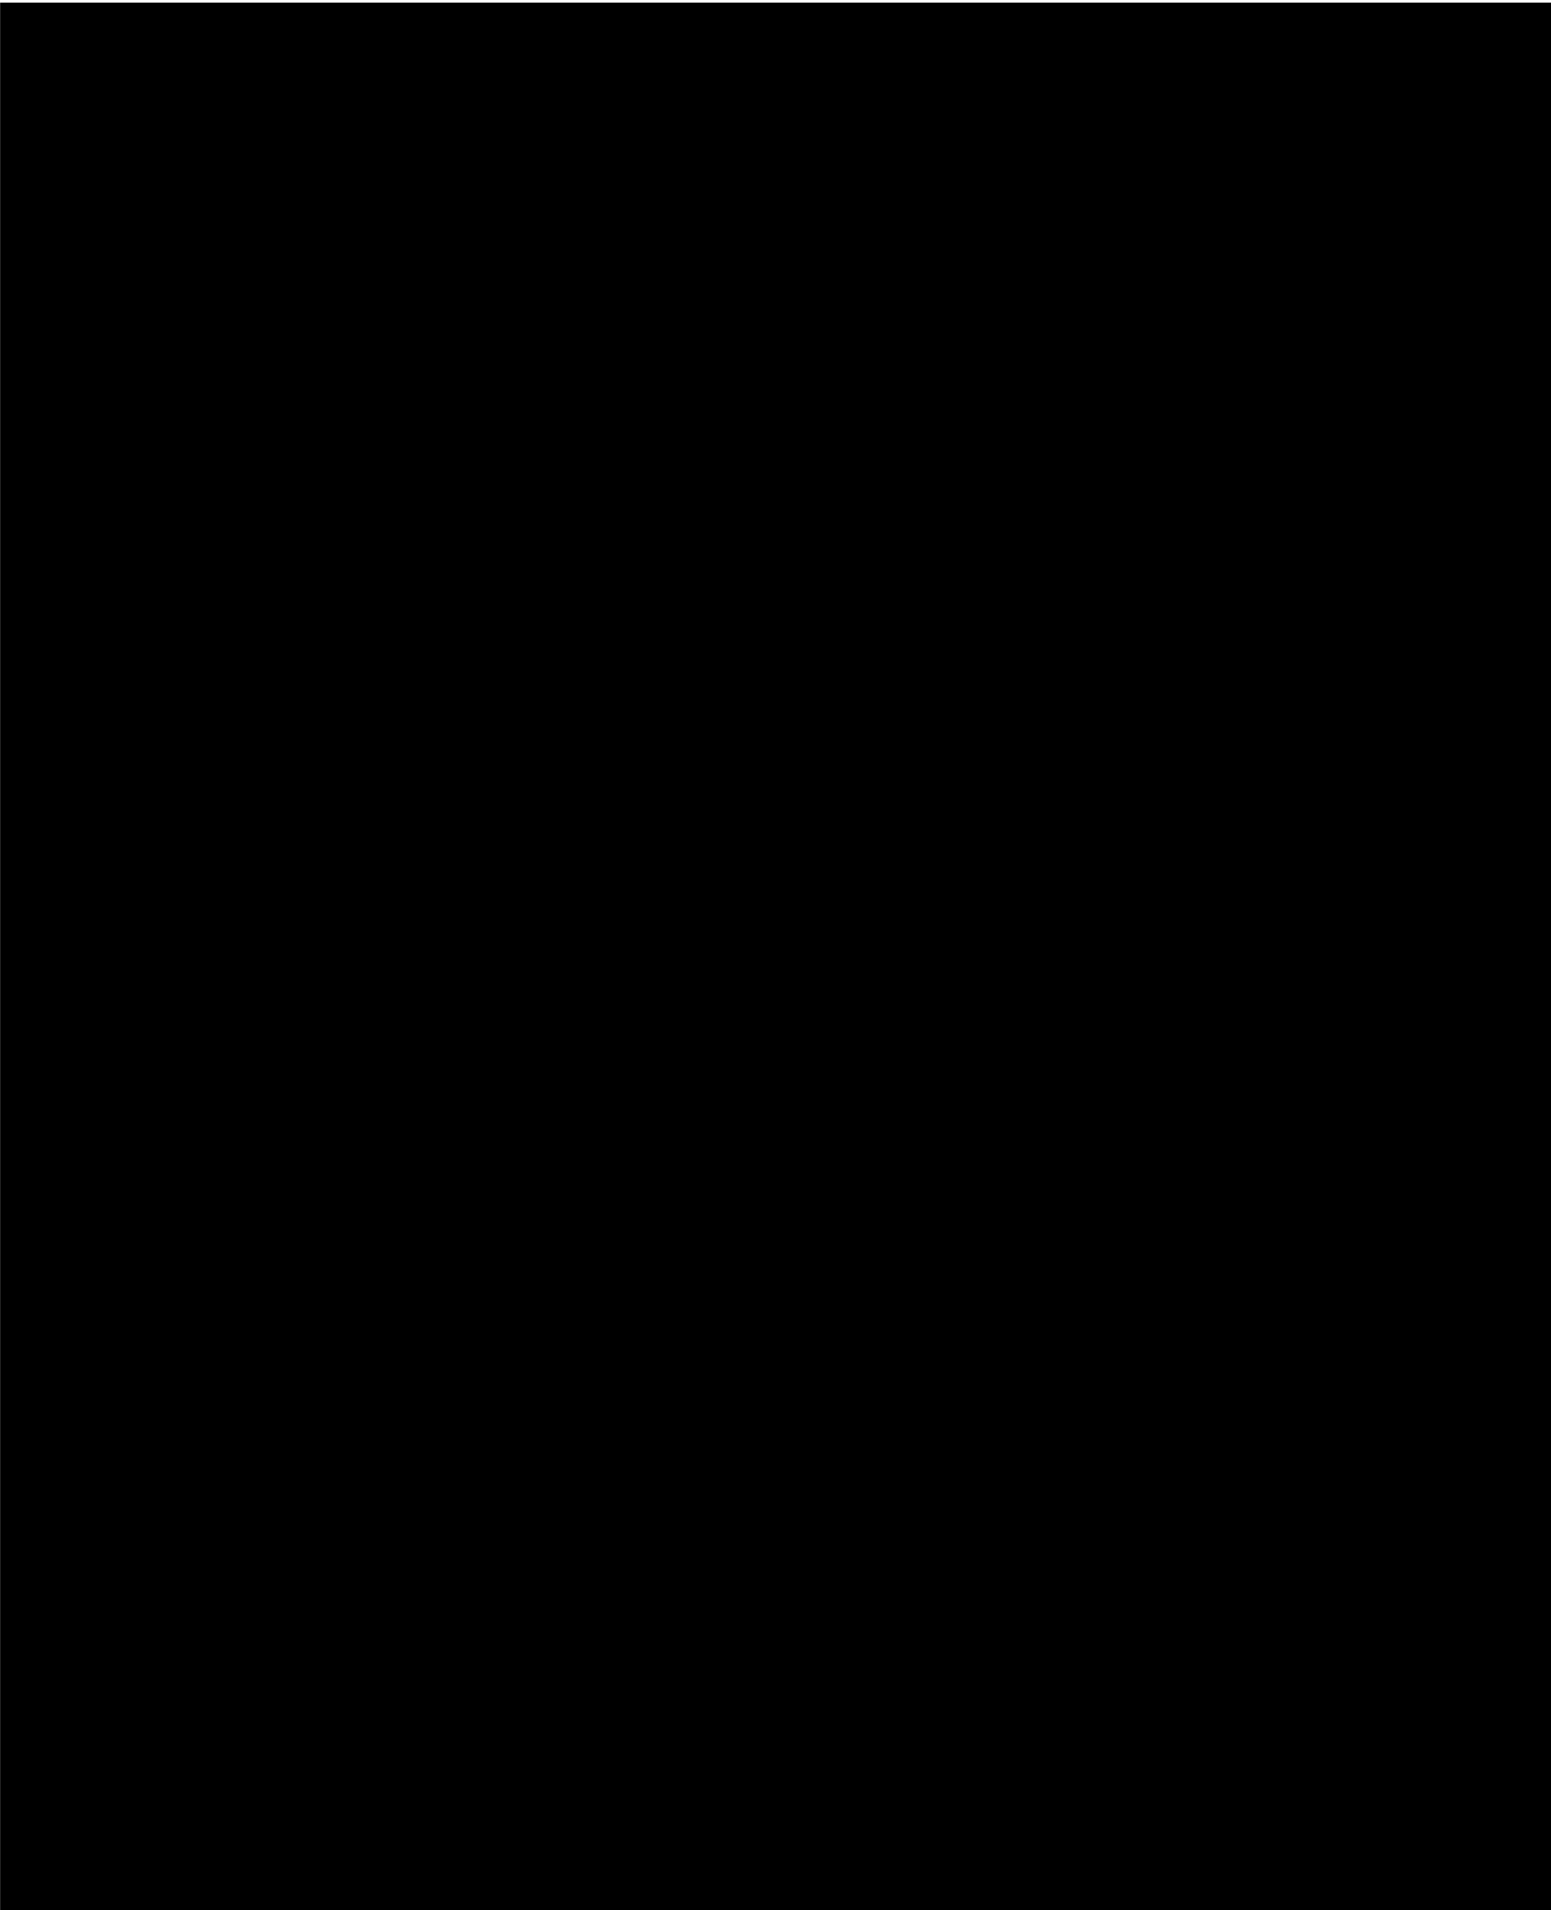

# Exhibit 264

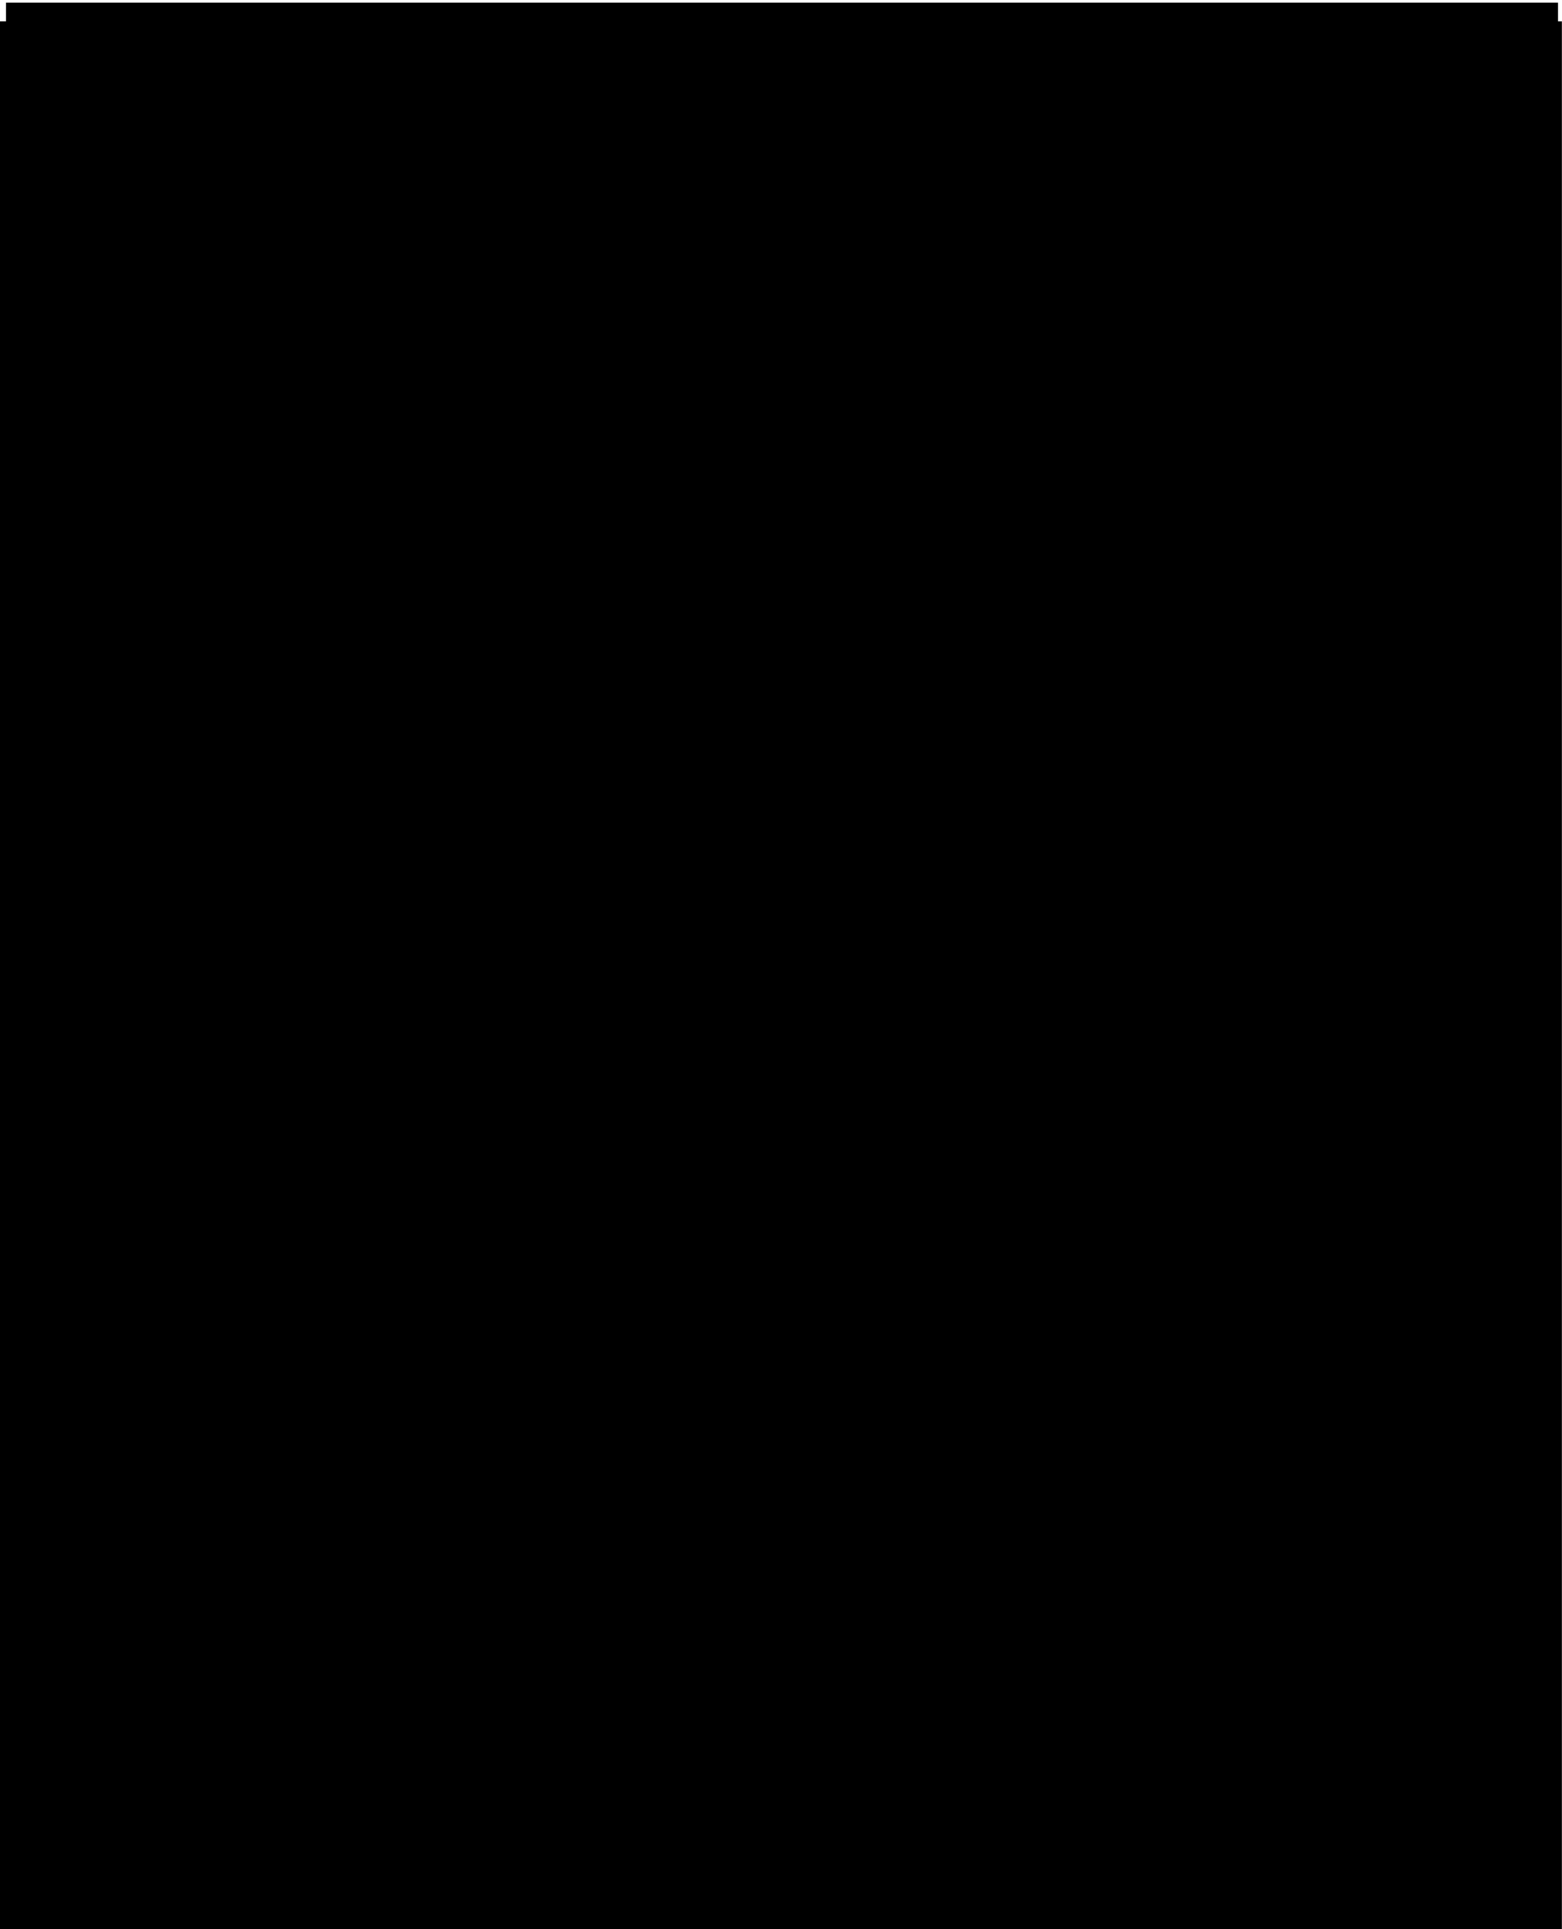

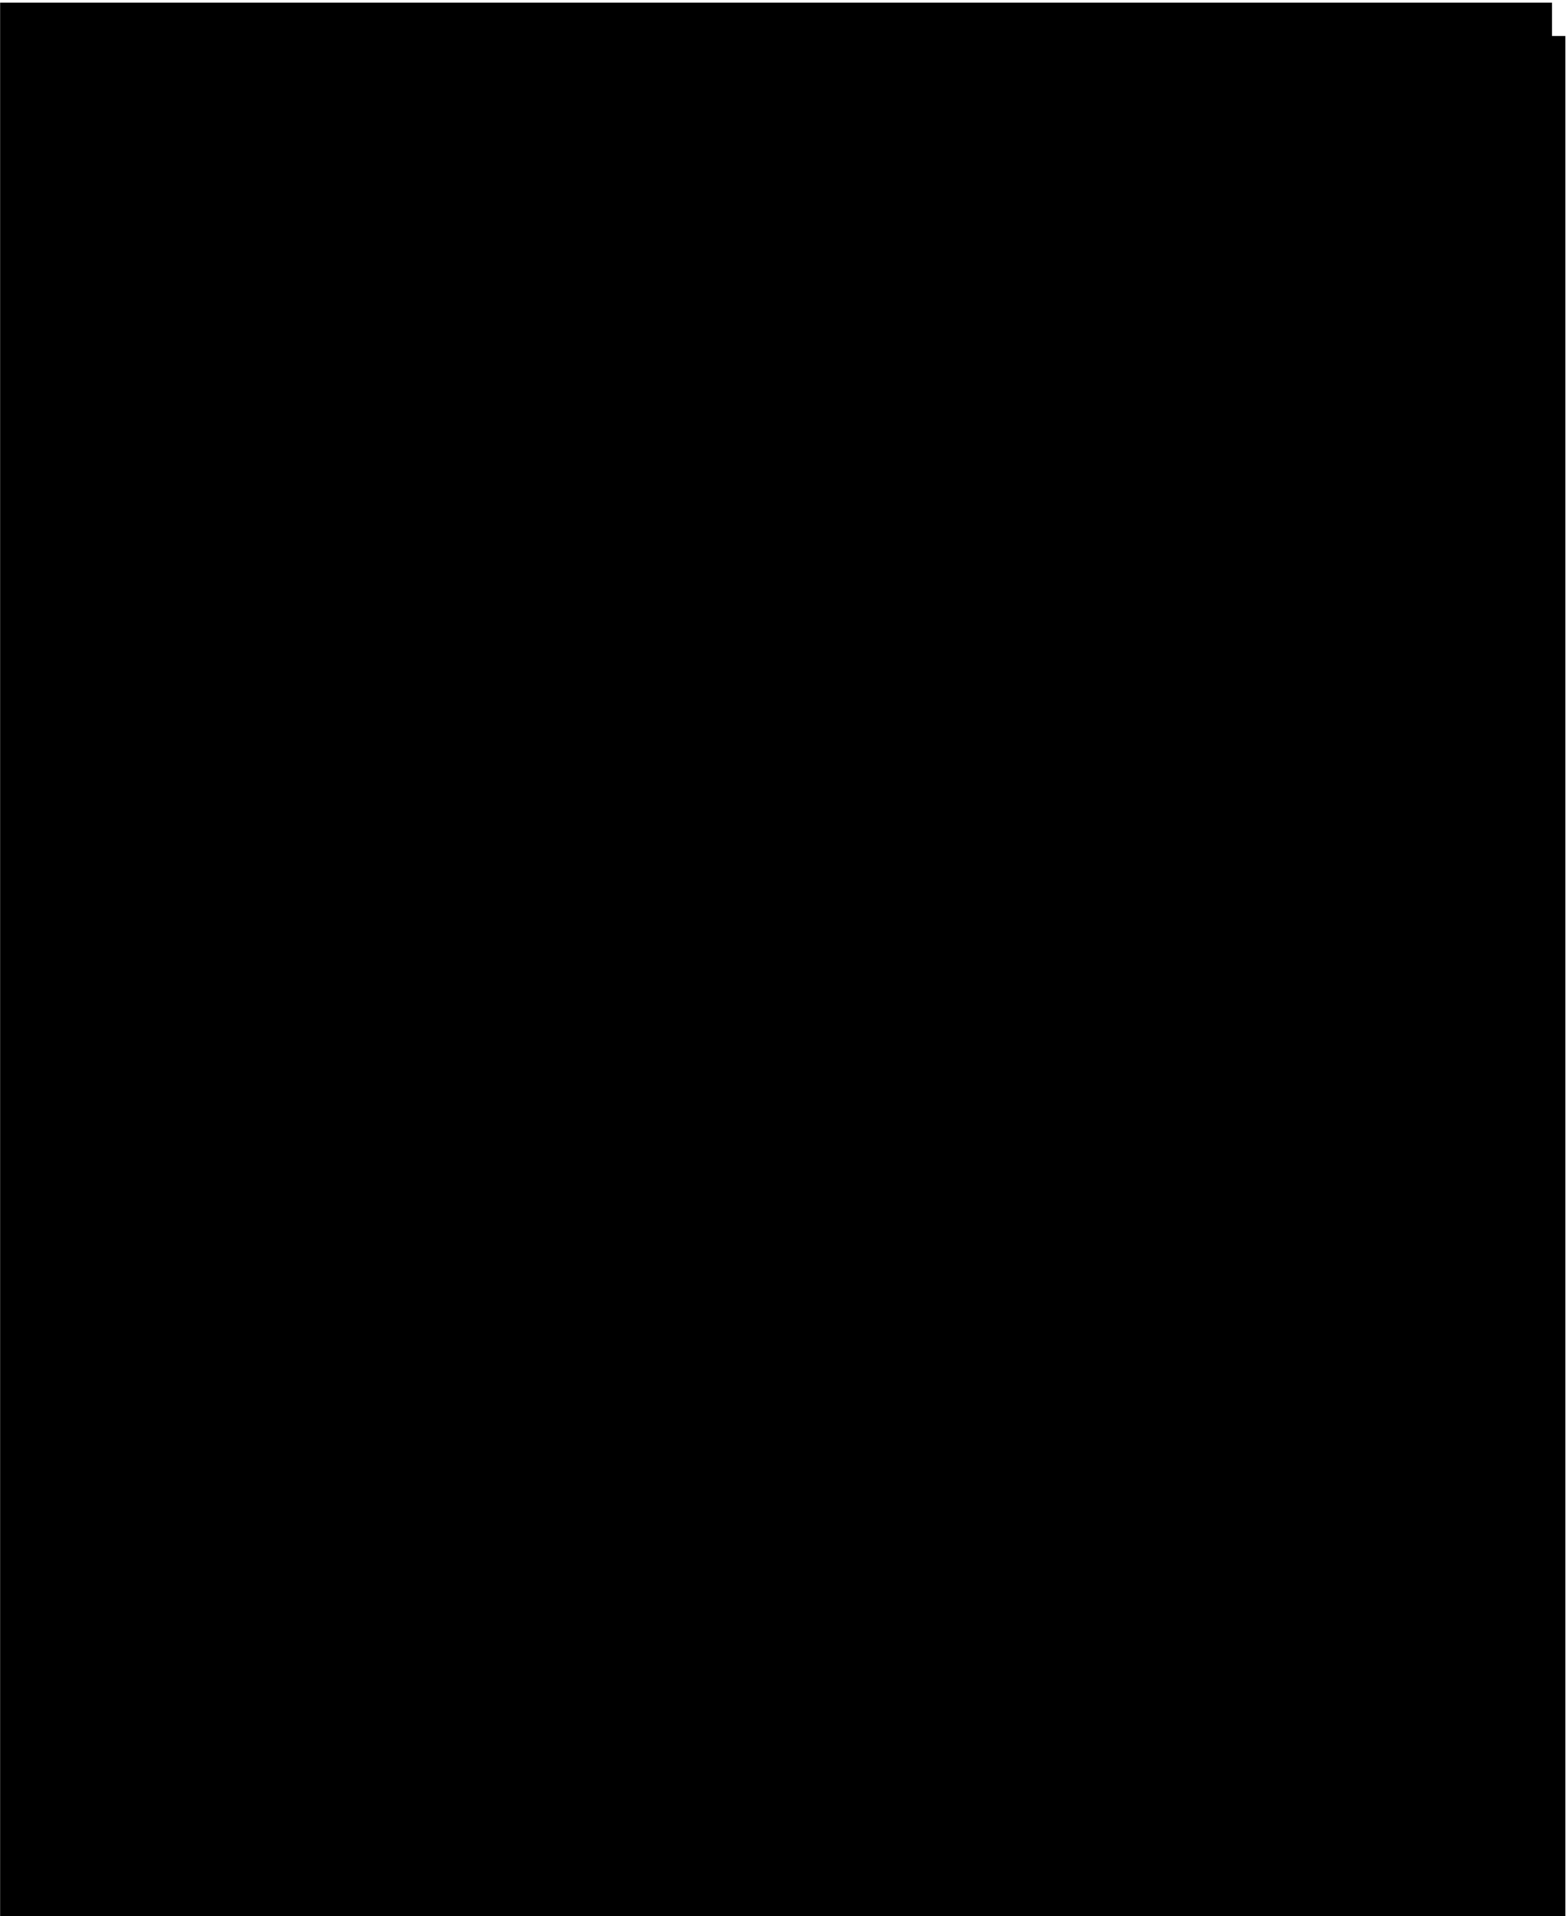

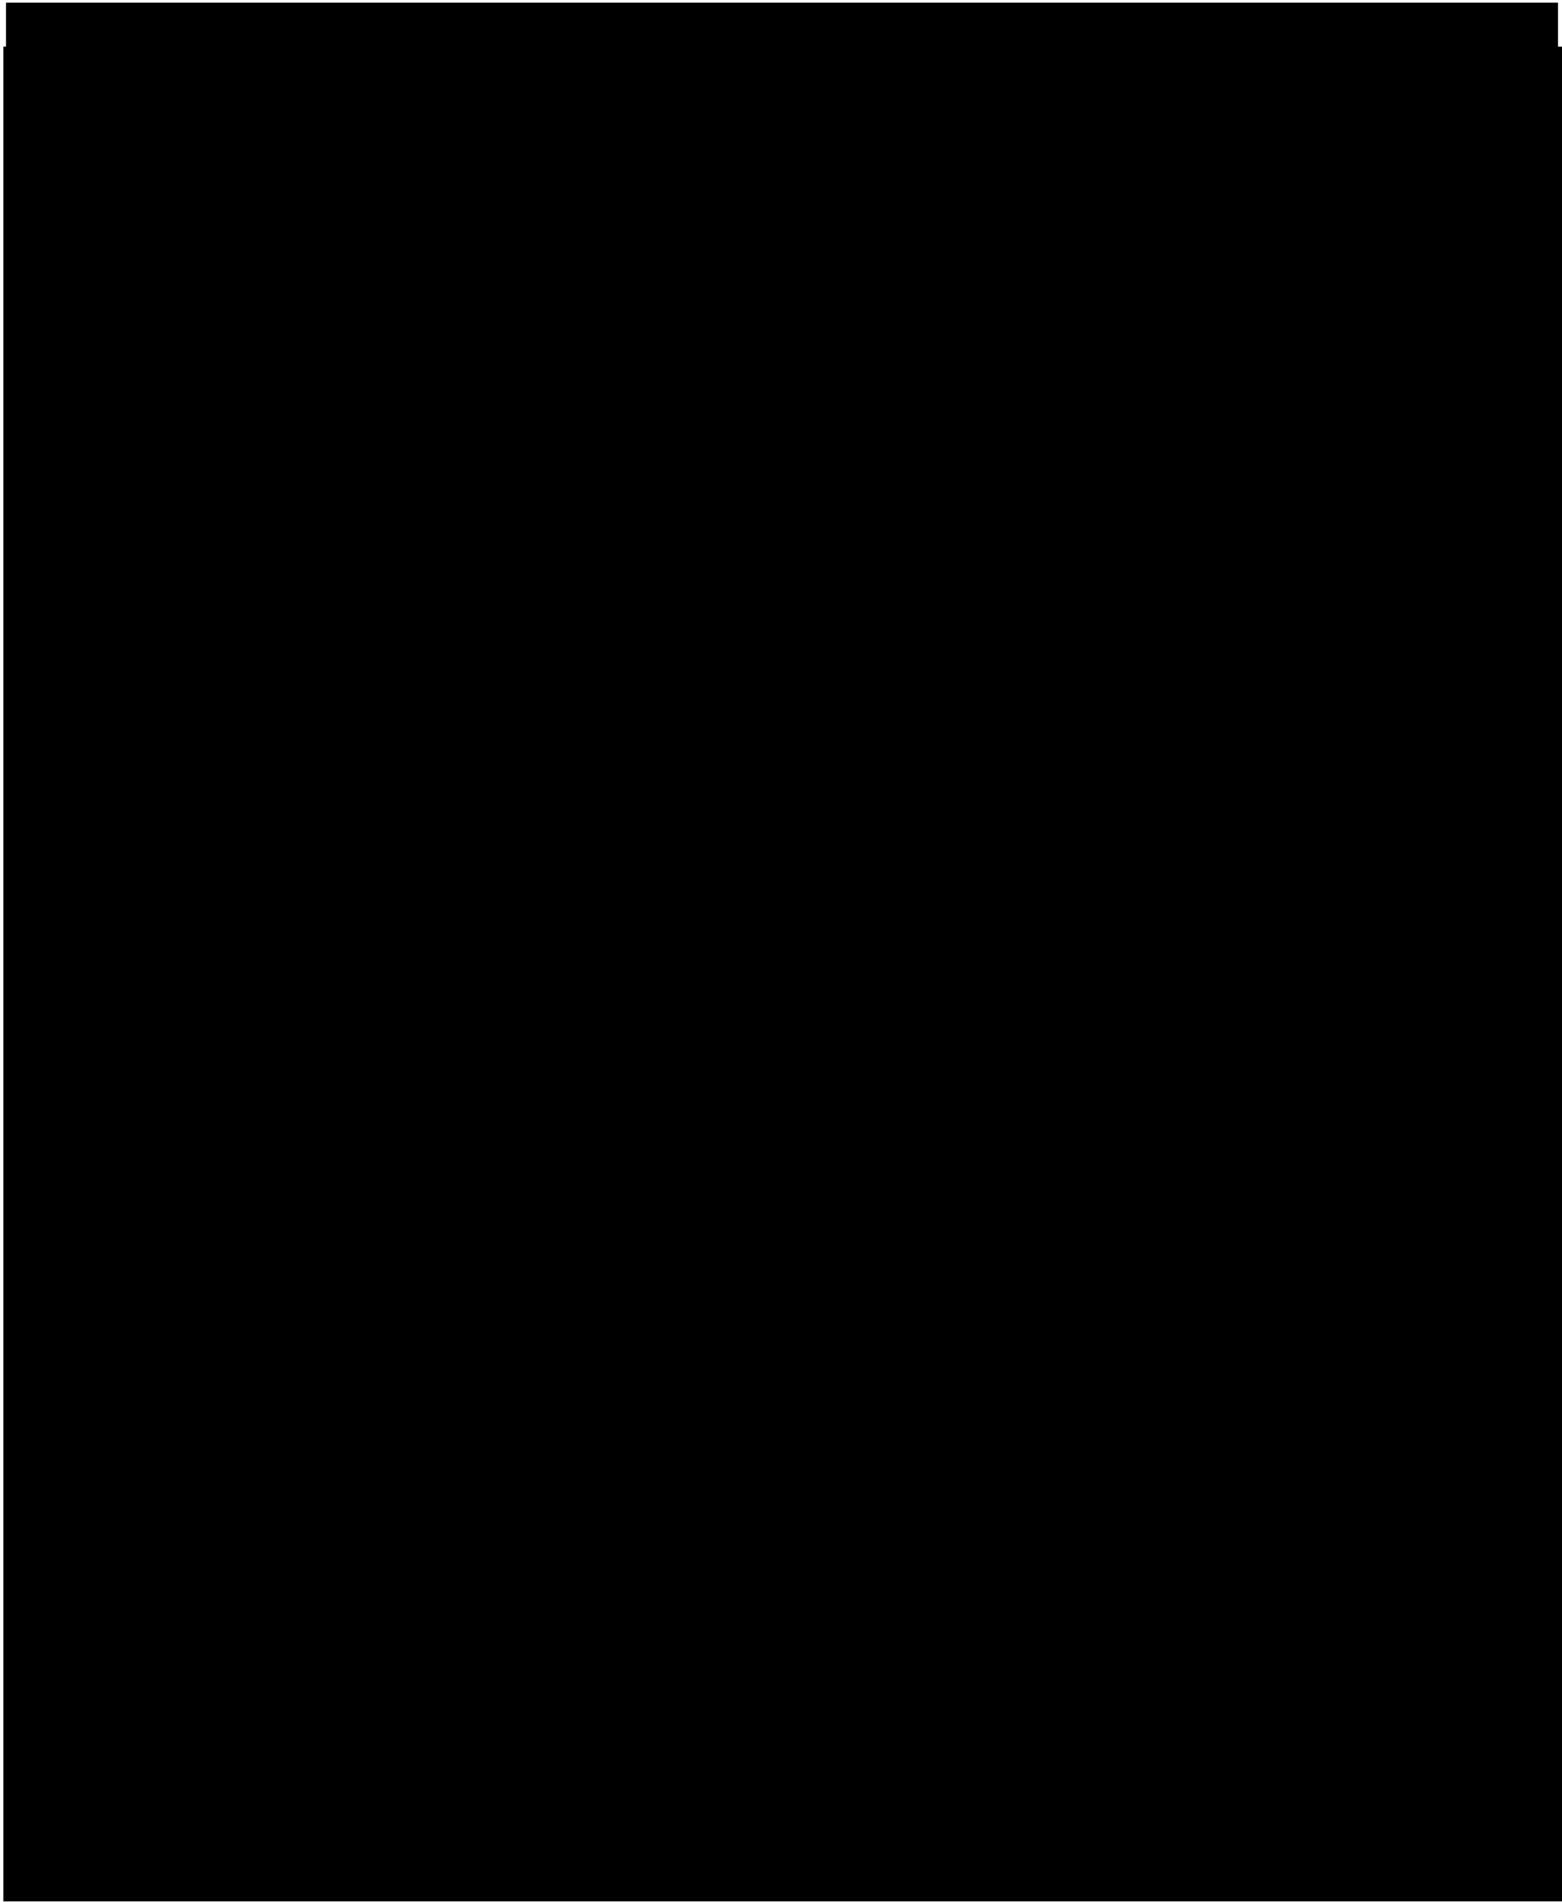

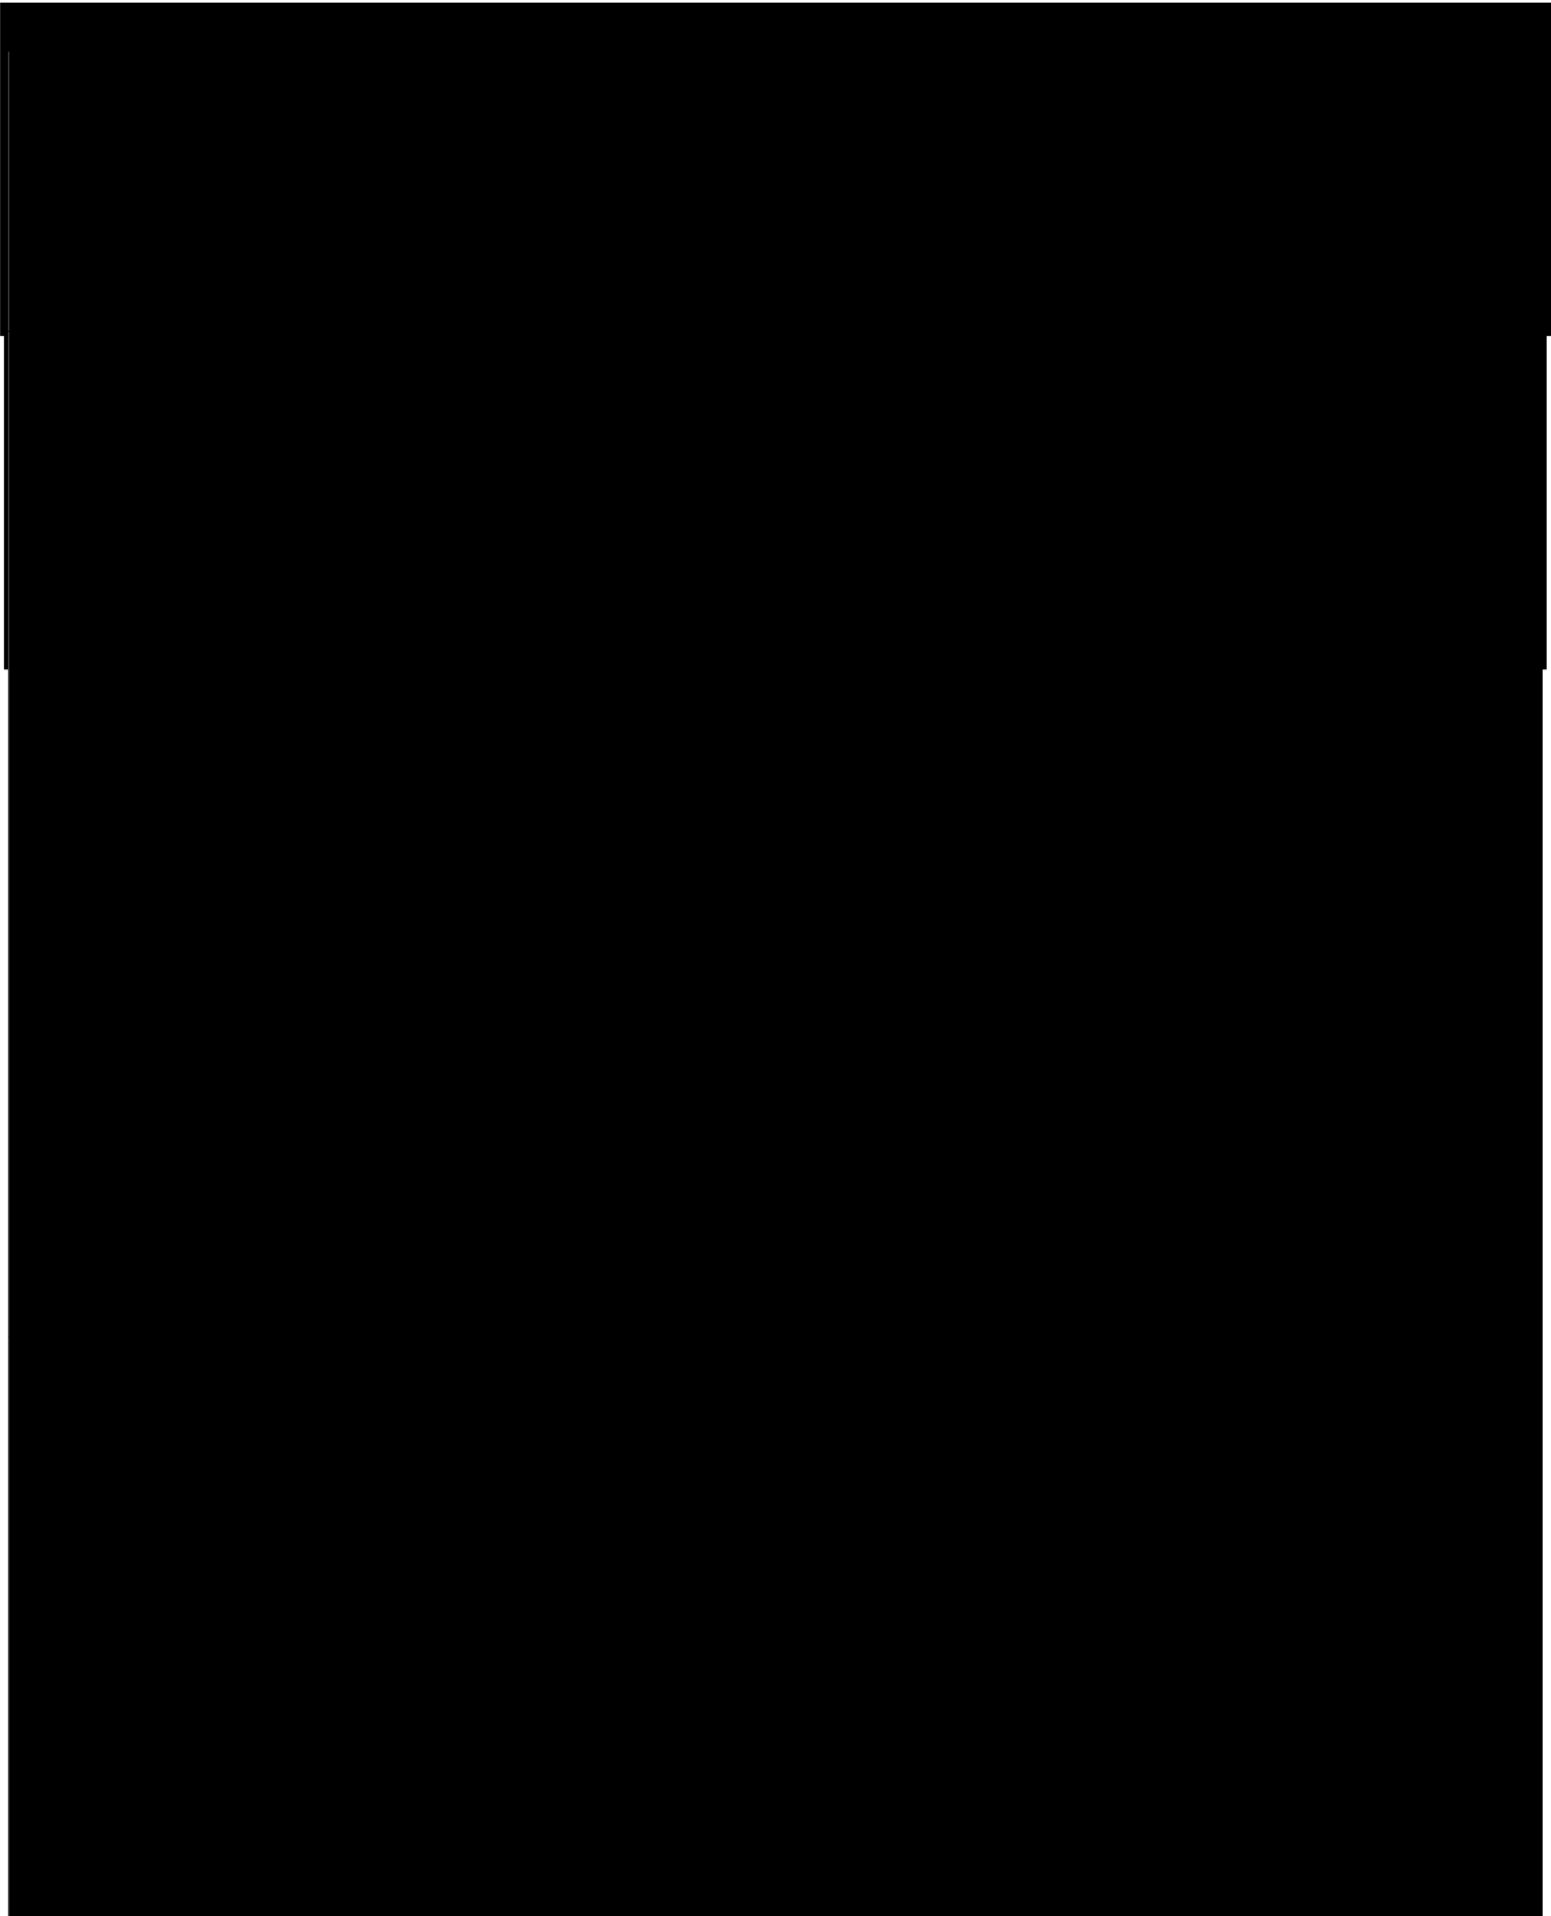

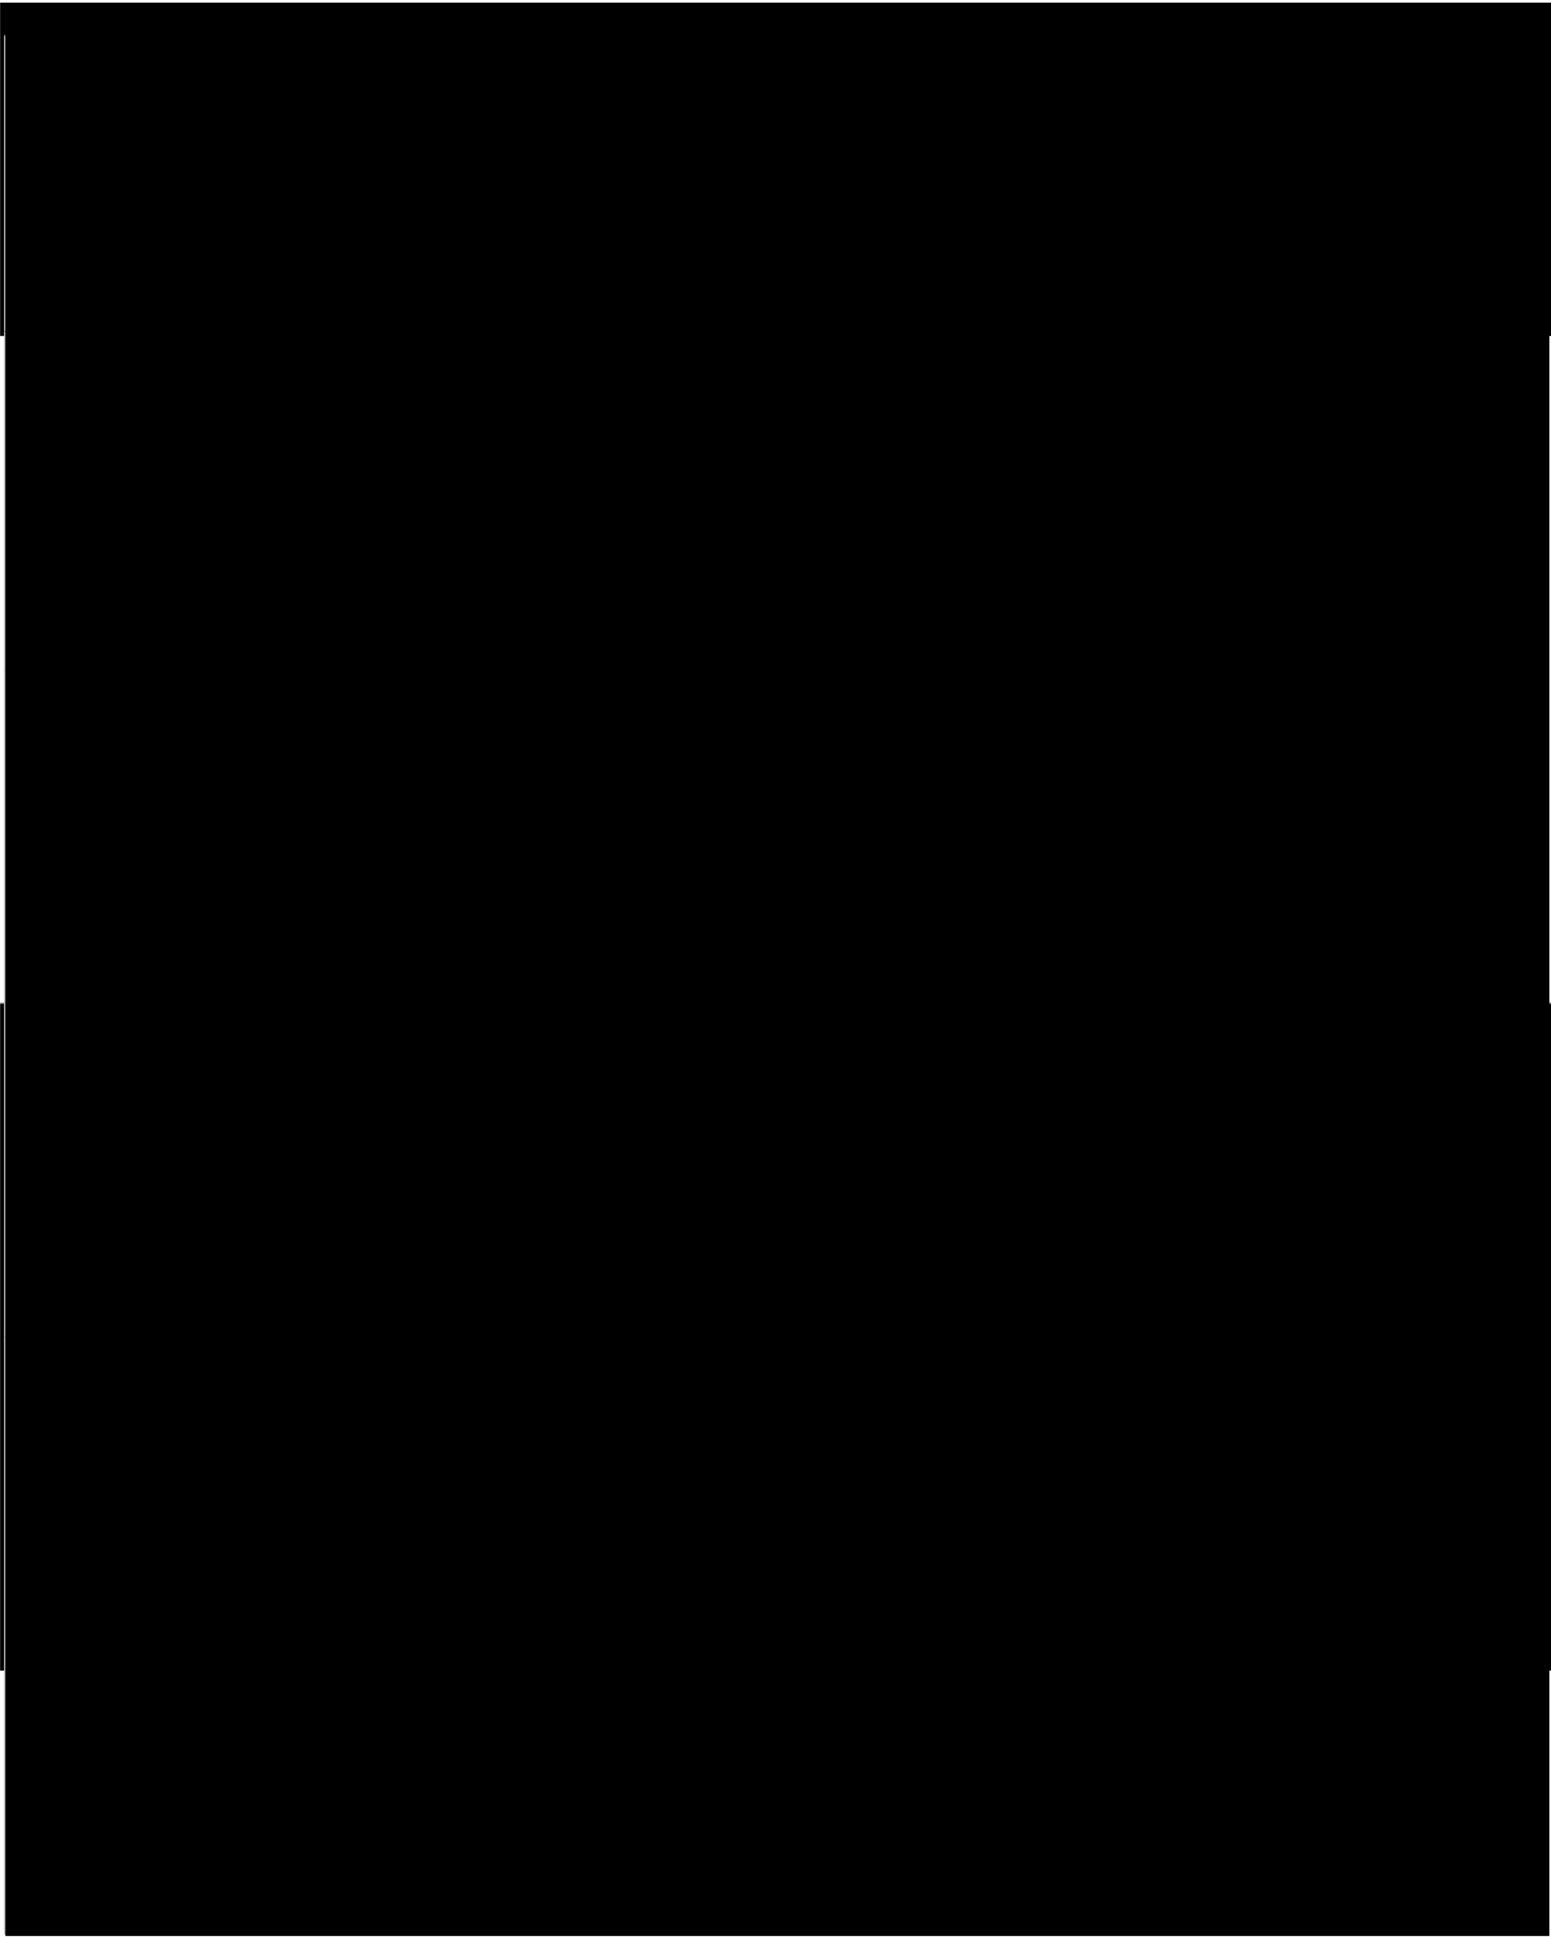

## Overview / Background

1. GSA 4.1 is a major overhaul of the GSA, which includes a broadened Google Now opt-in, which all users must accept in order to continue using assistive features (placing all users in a good state)

2. The opt-in includes clearer consents for device data, which have both account and device level controls, which require adding new privacy controls to [REDACTED]

- Status: Opt-in reviewed with Sundar and [REDACTED]

*REDACTED - PRIVILEGE*

- Status: No change to [REDACTED] features
