2006 WHEREAS, the illicit manufacture of methamphetamine (meth labs) is a serious problem in Arizona; and

WHEREAS, fires, explosions, and hazardous materials contamination are common occurrences associated with meth labs because of the flammable and toxic nature of the chemicals used in methamphetamine production; and

WHEREAS, meth labs are found in houses, apartments, hotel and motel rooms, trailers, in both residential and commercial areas, exposing law enforcement personnel, other first responders, children of persons operating meth labs, and other persons in physical proximity of meth labs to extremely dangerous conditions; and

WHEREAS, ephedrine, pseudoephedrine, norpseudoephedrine, and/or phenylpropanolamine are key ingredients in methamphetamine production, and are found in several over-the-counter cold and allergy medications; and

WHEREAS, by purchase or theft, these over-the-counter cold and allergy products are a prime source in the production of methamphetamine; and

WHEREAS, the unrestricted access to products containing ephedrine, pseudoephedrine, norpseudoephedrine, and/or phenylpropanolamine is a nuisance that endangers the public, health safety, and welfare; and

WHEREAS, other jurisdictions have found that the restricted use of open access to these products and requiring identification of buyers has substantially reduced the number of meth labs in those jurisdictions;

WHEREAS, the Mayor and Town Council of the Town of Buckeye, have determined that it is in the best interest of the Town to amend Chapter 8 of the Buckeye Town Code to regulate the sale of products containing ephedrine, pseudoephedrine, norpseudoephedrine and/or phenylpropanolamine.
